**DETAILED ACTION*****Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 5-7 and 9-11 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 14-17 of copending Application No. 10/674,768. Although the conflicting claims are not identical, they are not patentably distinct from each other.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

This rejection was maintained in the previous Office Action (mailed 10/02/07). It remains in effect. **The Examiner again notes Applicant's comments directed to**

**addressing this rejection upon the indication of any allowable subject matter in either Application. See Applicant's Arguments, submitted 4/2/08, page 6.**

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 5-7 and 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Butler et al. (6,589,726). This rejection was maintained in the previous Office Action (mailed 10/02/07). It remains in effect. Please see response to Arguments below.

***Response to Arguments***

5. Applicant's arguments filed 4/2/08 have been fully considered but they are not persuasive. Applicant has amended claims 5 and 9 to include the limitation of using the "light directed maskless array synthesizer" and then argued that Butler does not teach this feature. In particular, Applicant has argued that a maskless array synthesizer refers to an instrument that includes a DMD array (page 5, lines 3-14) and Butler teaches away from a light directed approach (page 5, lines 15-24).

6. The Examiner respectfully disagrees and submits that Applicant's arguments are beyond the scope of the claim as currently written. The claim as currently written does not recite or require a DMD array. The claim simply recites the use of a "light-directed maskless array synthesizer". As written, then, the claim requires a device that does not use a mask and directs light onto the array during array synthesis. This is what Butler teaches. In Paragraph 5 of the previous Action, the Examiner noted the passage from columns 10 and 11 which teach the lack of a mask during use. The Examiner now directs Applicant to columns 11 and 12 where Butler teaches the use of patterned photolytic energy to remove protecting groups during synthesis in column 11, lines 50-61 and column 12, lines 19-51. This is a teaching of directing light during synthesis. Therefore, Butler teaches the use of a "light-directed maskless array synthesizer".

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1797

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
